Washer extractor Metos SC65P with pump drain

Product information

SKU	4160725
Productnaam	Washer extractor Metos SC65P with pump drain
Afmetingen	595 × 585 × 850 mm
Gewicht	73,000 kg
Capacity	6.5 kg
Technical information	400 V, 10 A, 3,2 kW, 3NPE, 50 Hz CW: 3/4" Drain: ø 3"

Description

Professional washer extractor Metos SC65P with a drain pump is easy to use, thanks to the preselected programs and the clear digital display. A high spin removes the excess water from the textiles and shorten the drying time.

The washer extractor Metos SC65P is suitable for use when washing times are up to four times per day. The capacity of the washer extractor is 6 ,5 kg and the extraction speed is 1400 rpm. The washer extractor has a number of preselected programs (white 90°C , white/color 60°C, white/color 40°C, super quick wash 60°C, super quick wash 40°C, synthetics 40°C, wool/hand wash 30°C, rinse) that can be replaced. The display shows the program name, the water temperature and the spin speed. The time remaining is shown in hours and minutes in the display. Once a program is selected, the estimated program time is displayed. The washer door opens automatically once the program has finished (possible

to deactivate). Two minutes after the wash program finishes the display backlighting enters energy saving mode.

The washer extractor has a soap hopper (pre-wash, main wash, fabric softener compartments) at the front that makes the detergent dosing easy. The detergent compartment, trap and drainage are easy to remove and attach that makes the cleaning easier.

Matching dryer DAM6 available - space saving when placed on top.

- With drain pump
