Foam cleaning device Metos Nommo

Product information

SKU	4197224
Productnaam	Foam cleaning device Metos Nommo
Afmetingen	205 × 119 × 173 mm
Gewicht	5,000 kg
Technical information	CW: 1/2" HW: 1/2"

Description

Metos NOMMO Foam cleaning device is specially developed for cleaning, rinsing and disinfecting surfaces. Two different chemicals with separate nozzles ensure clean, hygienic surroundings and smooth washing.

Foam cleaning device is equipped with multifunctional foam/wash selector, which is easy to use. Select cleaning, rinsing or disinfecting. The unit can dose separate chemicals for cleaning and disinfection. 15 meters long hose and nozzles large stream can reach areas, that are hard to reach. A different foam nozzle can be switched onto hose for foam washing. Rinsing nozzle is equipped with a 23-centimeter shaft.

Foam cleaning device works efficiently with a 2-6 bar water pressure from the hose. The device is safe to use, because the hose doesn't need to be switched while changing chemicals. This prevents chemical splashes.

- stream- and foam features
- large stream
- switchable dosing nozzle ensures the right doses

- safe to use, the hose doesn't need to be switched while changing chemicals.
- strong, unique and simple design, with cast ABS-case
- stainless steel backing plate
- built-in non-return valve
- easy to install, use, maintain and clean
- temperature max 70°C
- min./max. water pressure: 2-6 bar
- water usage rinsing: 10,5 l/min
- water usage foam: 5,1 l/min
- water usage disinfecting: 5,1 l/min
- weight 1 kg
