Induction Metos Hold line Metos Hold-line Metos Ho/IN 1350

Product information

SKU	4231495
Productnaam	Induction Metos Hold line Metos Hold-line Metos Ho/IN 1350
Afmetingen	322X 3 × 322 × 75 mm
Gewicht	23,000 kg
Capacity	Plate 322x322x75 mm x 3
Technical information	230 V, 10 A, 1,35 kW, 1N, 50 Hz

Description

Metos Induction Hold line HO/IN 1350
Includes three induction heating plates, one generator and two temperature controls

- INDUCTION HEATING PLATES
  Drop in induction plates measures are 322 x 322 x 75 mm. They are suitable for all the containers designed for induction use. Flat a
  nd compact design helps the installation.
  Accurate temperature control thanks to three temperature sensors.
  Large and clear temperature display on the induction plates.
  Strong dark ceramic glass surface stands a heavy use and is easy to clean.
  Energy efficient and safe solution. No additional power output when the containers are removed from induction plates.
  Power is concentrated only into the containers, which reduces the unnecessary heating around the environment.

Efficiency is 3 x 450 Watts

- GENERATOR
  One efficient generator.
  Easy to install with plugged cable connection.
  Please note! The generator requires a powerful ventilation to keep is at the operating temperature.
- TEMPERATURE CONTROL
  One temperature control for both induction plates
  Stepless temperature adjusting from 50°C - 100°C
  Real time temperature control maintains the entered temperature to within a degree.
  Control measures the bottom temperature of the containers.
