Inducs Metos Hold-line HO/IN 2400-GN

Product information

SKU	4231604
Productnaam	Inducs Metos Hold-line HO/IN 2400-GN
Afmetingen	320X 3 × 520 × 75 mm
Gewicht	29,300 kg
Capacity	Plates 3x320x520x75 mm
Technical information	230 V, 16 A, 2,4 kW, 1N, 50 Hz

Description

Metos Induction Hold line HO/IN 2400-GN
Includes three induction heating plates, one generator and two temperature controls

- INDUCTION HEATING PLATES
  Drop in induction plates measures are 520 x 320 x 75 mm. They are suitable for all the containers designed for induction use and esp
  ecially well for GN 1/1- containers. Flat and compact design helps the installation.
  Accurate temperature control thanks to three temperature sensors and six induction coils.
  Large and clear temperature display on the induction plates.
  Strong dark ceramic glass surface stands a heavy use and is easy to clean.
  Energy efficient and safe solution. No additional power output when the containers are removed from induction plates.
  Power is concentrated only into the containers, which reduces the unnecessary heating around the environment.
  Efficiency is 800 Watts per plate
- GENERATOR
  One efficient generator.

Easy to install with plugged cable connection to the induction plates.
Please note! The generator requires a powerful ventilation to keep is at the operating temperature.

- TEMPERATURE CONTROL
  Two temperature controls: one operates with one plate and the other with two plates
  Stepless temperature adjusting from 50°C - 100°C
  Real time temperature control maintains the entered temperature to within a degree.
  Control measures the bottom temperature of the containers.
