

Roller table Metos WD-12/12S PPE

Product information

Artikelnummer	4246197
Productnaam	Roller table Metos WD-12/12S PPE
Afmetingen	1200 × 620 × 850 mm
Gewicht	30,000 kg
Technical information	Drain: ø 32 mm

Description

Thanks to the Metos WD-12 PPE roller conveyor, working motion always occurs at an ergonomic height, while the need for lifting and carrying is minimised. The conveyor is an excellent tool for washing equipment and is easy to keep clean.

The structure of the roller conveyor is made entirely from hygienic stainless steel. The rollers spin easily under the baskets, making it quick and easy to take equipment out of the machine. The basin beneath the rollers is the same size as the entire conveyor. Sufficient basin inclination ensures no water remains standing in the basin. The conveyor's shelf rack can be washed in the equipment washer.

The pre-washing fixing attachment supplied with the roller conveyor is easily moved to either side, meaning that the conveyor can be installed before the equipment washer as left-handed or right-handed.

- the conveyor should be connected to the Metos WD-12 PPE equipment washer

- stainless steel structure
- basin covering the entire conveyor
- inclined basin and drain valve
- lower shelf rack

CONTENT OF DELIVERY:

- debris basin
- drain valve
- shelf rack
- pre-washing fixing attachment

EXTRAS (to be ordered separately)

- splash guard sized to client's preferences
