

Undercounter dishwasher Metos Master Premium 50 DA (with wat

Product information

Artikelnummer	4246481
Productnaam	Undercounter dishwasher Metos Master Premium 50 DA (with wat
Afmetingen	600 × 610 × 850 mm
Gewicht	64,500 kg
Capacity	Max 60 racks/hour
Technical information	400 V, 6,65 kW, 3NPE, 50 Hz CW: 3/4" HW: 3/4" Drain: ø 24 mm

Description

Metos Master Premium 50 DA dishwasher is top of the line product for places where first class washing result is necessary. The dishwasher is highly equipped so accessories are not needed.

The best washing result

The machine has six washing programs. Four with a standard rinse (1, 1,5, 2 and 3 minutes) and two with Clean Water programs (3 and 6 minutes). During the standard rinse program the water in the basin changes equal to the rinse water quantity. The water consumption is 2,5 liter/basket. One of the standard rinse programs is for glasses and the rinse temperature is 70°C.

In Clean Water program the washing is done with clean water since the

water in the washing tank is automatically renewed before rinse. Clean Water program makes the most perfect washing result for example wine glasses although they are washed after dirty dining dishes. The consumption of rinsing water in Clean Water programs are 7 liters/basket.

With Smart Drain technique the dirty water is removed from the bottom of the tank rather than from the fresh water on the surface, through the overflow pipe.

The rinsing system Metos Master Plus takes the rinsing water through the break tank to the boiler and with the help of the rinsing pump on to the dishes. The water quantity and the water pressure remain optimal thanks to the Plus system.

Easy to monitor

The innovative START button clearly shows the functions of the dishwasher thanks to the multi-chrome and flashing functions. Diagnostic function supports self-monitoring to monitor the operation of machine and warns of possible error situations.

Wherever

Metos Master Premium 50 can be connected with cold or warm water connection. The machine is equipped with M-Power multi-voltage connection function. The change of voltage supply can be done by changing the position on the switch. The dishwasher is equipped with a drain pump.

- equipped with a water softener for automatic softening the water
- 6 wash-cycles
- the washing continues until the boiler has reached a sufficient temperature
- the temperature of final rinse ensured with ThermoStop function
- diagnostic function
- language selection of the menu control
- Multi-Cromatic START key
- rounded edges in the tank facilitate cleaning
- easy to remove s/s wash arms
- water supply hot or cold water
- easy-change voltage function, directly from the cables connection
- tank volume 10 l
- boiler capacity 11 l
- boiler heating element 6,0 kW
- energy saving function
- acoustic and thermal insulation keeps the noise level and the surface temperature low

Delivery includes:

- detergent dispenser
- rinse aid dispenser
- pressure boosting pump
- drain pump
- rinsing pump

- basket for plates
- basket for glasses
- cutlery cylinder
- water softener

Optional (to be ordered separately):

- stand
