Afmetingen	985 × 725 × 1324 mm
Gewicht	207,000 kg
Capacity	display area 1,46m2
Technical information	230 V, 0,569 kW, 1NPE, 50 Hz
Type of the refrigerant	R134a
Quantity of refrigerant [g]	250

Description

Stylish Metos Cube II 1000 glass display for self-service has a trendy design and helps the products to look attractive on every shelf, providing a fine framework for the sales

The sales area of this spacious glass display is 1.46 m2. The top structure of the glass display is made of tempered double glass. Cool air evenly circulates through the three tempered glass shelves with the help of a cooling fan. The customers can easily access their purchase through an open front part of the self-service glass display. The sliding doors with ball bearings on the seller's side are easy to open.

The LED-light at the top part of the Metos Cube II 1000 self-service

display and the glass shelves provide a clear and almost unobstructed view on the display with the visible black frame adding the sense of integrity. The bottom plate and the bottom panel of the display are grey (RAL 9006), available also in other RAL-colours at a separate price. The explicit design of this glass display allows it to be placed in a coffee house, bakery, transport station or a hotel lobby.

The glass display, equipped with an electronic control unit, has an automatic defrosting and evaporation of the meltwater.
The temperature range is +4...+8?C (ambient temperature +25?C and relative humidity 60%). A handy pull-out machinery for quicker maintenance.
