Product information

SKU	4550310
Productnaam	Black compartment basket Metos with yellow compartment for 1
Afmetingen	500 × 500 × 106 mm
Gewicht	0,000 kg
Capacity	16 pcs. Ø110 x 70 mm glass

Description

Designed especially for washing of glass. Offers excellent protection for fragile glass during washing, transportation and storage. Color coding facilitates recognition of glass.
Racks in the workpieces reduce the contact area to the minimum and prevent the threats from arising. Fits all dishwashers with standard dimensions in professional kitchens.
The material is made of lightly clean and scratch resistant polypropylene. Even fully loaded, the basket keeps the shape as a result of its rugged design, it slides easily on surfaces and even on conveyors.

Thanks to the design on the bottom of the basket, they are handy to stack, which eliminates transport and storage of the baskets.
The structure of the double walls still makes the basket without

unnecessary extra weight.

The diagonally placed handles offer a steady lifting grip and support for the carrying, with little muscle strength.
The smooth walls make it impossible for laundry and dirt to accumulate in the structure of the basket. The open bottom structure makes the water feasible. Because of this, the water jet can easily reach the vessels and the dirt water do not accumulate in the structure of the basket.
