Gewicht	18,500 kg
Capacity	up to 2 litres/minute
Technical information	230 V, 6 A, 0,8 kW, 1NPE, 50 Hz, 69 dB

Description

Metos Zummo Z22 is a very quiet, fruit and vegetables juicer for demanding professional use. With the help of the device, you can instantly prepare fresh and juices either to be offered as such or as components of desserts.

The device works on the centrifugal principle, where a strong rotary motion detaches the juice from fruits and vegetables. The raw materials are dropped into the tank from the feed opening at the top. The device can be running at all times when adding raw materials, which allows the minute capacity to reach two liters of finished juice. The juicer is quick to assemble and, thanks to the detachable parts, it only takes five minutes to wash. The device is to be installed on a table top. The rubber feet on the bottom hold the device firmly in place. Thanks to the anti-vibration rubber supports and the quiet motor, the device is comfortable to use.

- parts easily removable for washing, the appliance takes about 5

minutes to clean
- inlet diameter 75 mm
- waste container 9 liters
- capacity 2 liters of juice per minute
- outer shell in aluminum and black plastic, juice bowl in stainless steel
