

Cold Brew Coffee Metos cooler unit

Product information

SKU	4000980
Productnaam	Cold Brew Coffee Metos cooler unit
Afmetingen	170 x 543 x 466 mm
Gewicht	18,000 kg
Capacity	12-16 litres/hour
Technical information	230 V, 10 A, 0,25 kW, , 50 Hz
Type of the refrigerant	R134a
Quantity of refrigerant [g]	90

Description

Now you can offer your customers a unique opportunity to serve cold brew coffee on tap to their customers. The cooling unit is small and smooth and it does not need any extra equipment to create a foamy lid on the coffee.

Choose coffee from your own supplier or make your own Cold Brew. Cold brew coffee is a new and exciting way to drink coffee. With slow extraction, the sweetness of the coffee is emphasized aromas and rounder flavors. The foam retains the taste.

Fresh, fresh and cool!
