Pump thermos D063 for Metos 2130-XTS-series coffee brewers

Product information

SKU	4157833
Productnaam	Pump thermos D063 for Metos 2130-XTS-series coffee brewers
Afmetingen	180 × 230 × 470 mm
Gewicht	2,500 kg
Capacity	3,8 litres

Description

The 3.8L pump lever airpot is an economical, convenient and safe solution for light duty self-serve beverage dispensing. Constructed of dual layer stainless steel, the vacuum sealed inner liner insulates and holds the beverage while the outer body layer protects the end user by staying cool to the touch.

The locking lid is designed to swing open fully for brewing directly into the airpot funnel for ease of filling with the secondary benefit of maximum heat retention.

The pump lever dispensing system is simple to use and allows the end user to precisely control the amount of liquid poured into their cup without lifting, holding or tilting the airpot.

A swivel carry handle helps make the airpot extremely portable for coffee service virtually “anywhere” and its small footprint allows for multiple flavor offerings in a limited amount of table or counter space.

It also features a rotating base for multi-directional cup filling!
