Product information

Artikelnummer	4213362
Productnaam	Water dispenser Albatross 2 high chrome
Afmetingen	131 × 190 × 469 mm
Gewicht	4,500 kg

Description

With the built-in Metos Albatross 2 dispenser, you can serve your customers chilled carbonated water or cold tap water. Water dispensing is made easy with the sturdy grips. The no-fuss design of the dispenser makes it perfect for serving lines and hotel reception areas alike.

The carbonic acid cylinder need for operating the device is not included in the unit, as a separate lease agreement has to be made with a gas supplier.

The refrigeration unit for the device (to be ordered separately) is installed within the serving unit, meaning the only visible part is the stylishly designed, shiny chrome dispenser, suitable for any venue. The tap outlets are at a height of 306 mm, so pouring water into tall glasses or decanters is easy.

The dispenser is available with two different sizes of refrigeration units, depending on the capacity of the serving area. The capacity of the Pro2 refrigeration unit is 150 litres of tap water or 90 litres of

carbonated water an hour. The capacity of the Pro2 XXL refrigeration unit is 270 litres of tap water or 90 litres of carbonated water an hour.

- cold carbonated water, cold water
- tap outlets at a height of 306 mm
- two taps for water alternatives
- built-in
