Productnaam	Juice squeezer automat Metos Zummo Z1
Afmetingen	340 x 387 x 678 mm
Gewicht	29,500 kg
Capacity	6,5 oranges/minute
Technical information	230 V, 0,165 kW, 1NPE, 50 Hz, 69 dB

Description

The Metos Zummo Z1 is a small-sized fresh juice dispenser that offers an affordable and efficient alternative for premises with limited space. The compact device fits on even a small table and weighs less than 30 kg and is easy to move from one serving point to another if necessary. The machine squeezes 6.5 fruits per minute and is recommended for destinations where the daily requirement is less than 30 glasses. The hopper holds about a kilo of fruit. The machine can be adjusted for either 55-70 mm or 63-75 mm oranges. Removable parts are machine washable except for the transparent front cover.

The unique EVS (Efficient Vertical System) squeezing system moves the fruit from the basket to the cup always vertically and also cuts the fruit in the same position. This way, the peel of the fruit never comes into contact with the juice and the bitter taste of the peel and any preservative residues are not transferred to the juice. The result is a clean, fresh fruit flavor and minimal waste.

- push buttons and user guide screen
- table top installation
- parts easily removable and machine washable
- orange diameter 55-70 mm
- the capacity of the feed basket is about 1 kg of oranges
- capacity 6,5 fruits per minute
