

Water dispenser Metos Calypso 2 with cooling unit PRO2 XXL

Product information

SKU	4000600
Productnaam	Water dispenser Metos Calypso 2 with cooling unit PRO2 XXL
Afmetingen	685 × 723 × 1186 mm
Gewicht	58,000 kg
Capacity	1 litre / 20 seconds
Technical information	230 V, 10 A, 0,95 kW, 1NPE, 50 Hz, 45 dB
Type of the refrigerant	R290
Quantity of refrigerant [g]	132
Evaporation temperature [C]	-10

Description

The built-in Metos Calypso2 water dispenser offers a wide operating range and large capacity water distributor, not to mention stylish design. Cold water, carbonated or without bubbles, flavoured or only as fresh water poured into a glass or jug, let the customer choose!

The refrigeration unit of the water dispenser is installed inside the serving unit, whereupon there is visible only an elegantly shaped faucet, and a drip tray that looks great in every setting. The glossy

black tap nozzle is 295 mm high, so water dispensing is also possible directly into the jug. The tap has a touch screen, from which the beverage is easy to choose. The touch screen can be programmed for up to 13 different beverage alternatives. Beverages can be adjusted to the size of the portion as well as the ratio of water and flavour, and beverages can be named as desired.

The touch screen language, background colour, brightness, and font can be changed from the settings. After a beverage is produced, a beep is heard, whose volume level can be adjusted. You can set the time for the screen saver to turn off the display when the device has been idle for a specified time. Saved drinking options can be copied to other drinking units via a USB connection.

The temperature of the water is adjustable from 5 °C to 12 ° C. The capacity of the water dispenser is 270 litres of carbonated or cold water an hour. From one bottle of flavouring, (500 ml), around 500 litres of flavoured water is obtained. The carbon dioxide required for use of the appliance is not included in the unit, but a separate lease agreement must be concluded with the gas supplier.

- cold carbonated water, cold water
- -different flavours directly dispensed in water
- capacity 270 l/h carbonated or cold water
- tap nozzle at a height of 295 mm
- the size of the portion and the ratio of water and flavour are adjustable
